

Masters's thesis at the Lucerne School of Engineering and Architecture

Title	Complementary Architecture
Student	Ashkinadze Ivan
Master's degree program	MA Architecture
Semester	FS 2021
Lecturer	Wettstein Felix, Molo Ludovica
External examiner	Strub Barbara

Abstract German

Der Eingriff in die Siedlung Muristrasse zielt darauf ab, das urbane Umfeld der Siedlung durch die Verbesserung der Aussenräume sowie die Schaffung neuer Urbanität zu regenerieren. Die neue Architektur steht in einem komplementären Verhältnis zu den bestehenden Nachkriegswohnungen und die Gültigkeit des Vorschlags beruht auf dem lebendigen stilistischen Kontrast zwischen Bestand und Neubau der Siedlung. Die Intervention zielt darauf ab, der Siedlung neue Nutzungen zu erschließen und damit neue Nutzer zu gewinnen, die die Vitalität der Siedlung erhöhen und sie stärker in das aktive urbane Leben der Stadt Bern einbinden. Das Projekt zielt auch darauf ab, das soziale Profil der Bewohner zu diversifizieren, indem verschiedene Wohnungstypologien bereitgestellt werden.

Abstract English

The intervention in the settlement in Muristrasse is aimed to regenerate the urban environment of the settlement by improving the outdoor spaces as well as providing new urbanity. The new architecture has a complementary relationship with the existing post-war housing and the validity of the proposal rests on the vivid stylistic contrast between the existing and new buildings of the settlement. The intervention seeks to provide new uses for the settlement and therefore to attract new users which would improve the vitality of the settlement and engage it more in the active urban life of city of Bern. The project aims also to diversify the social profile of the residents by providing various typologies of housing.

Main objectives

- Provide the sense of intimacy to the neighbourhood
- Bring the human scale to the public spaces
- Create new urbanity complementary to the existing buildings
- Bring variety of spaces and introduce complexity of form

Complementary Architecture

Juxtaposition of contrasting urbanity as means
of urban renewal

Spring semester 2021

By Ivan Ashkinadze

Content

1	Introduction	p.7
2.	Main Body	p.11
2.1	Urban Scale	p.11
	Isolation vs transformation of historic urbanity	p.11
	Complexity of the whole	p.16
	Varying density and hierarchy of spaces	p.22
	Permeability	p.26
2.2	House Scale	p.30
	Repetition vs variety in floor plan	p.30
	Height differentiation	p.33
	Variety of form / stylistic contrast	p.38
2.3	Detail Scale	p.43
	Solid vs transparent	p.43
	Flat vs multi-layered facade	p.49
3.	Conclusion	p.55
4	Sources	p.58
5	List of Figures	p.59
6	Declaration of Originality	p.60
